Work Experience

Rafusoft

Currently working as a Team Leader, where I guide a development team to deliver innovative software solutions. My role focuses on Laravel-based backend development, SQL database management, and building responsive web applications to ensure both scalability and user satisfaction.

- Led a team of developers, providing mentorship, task management, and code reviews.
- Built secure and scalable applications using Laravel with optimized SQL databases.
- Designed responsive, mobile-first UI for enhanced user experience.

Tech IT llc

Worked remotely for TachIT LLC, a technology-focused company specializing in software solutions. Contributed to 4 key projects using Django Framework and SQLite database, and delivered 10+ WordPress projects, including robust E-commerce platforms and dynamic functionalities..

- Django Framework Development: Designed and implemented scalable web applications with SQLite database integration.
- WordPress Expertise: Delivered over 10 projects, customizing themes, plugins, and functionalities for client needs.
- E-Commerce Solutions: Created user-friendly and feature-rich E-commerce websites with payment integration and responsive designs.

Education

Diploma in Computer Science, SSR Institute (2025)

Completed with CGPA 3.43, specializing in Backend Development using Django & Laravel, with hands-on experience in Flutter for cross-platform app development.

Diploma in Computer Science, Infra Polytechnic (2022)

Completed with CGPA 3.43, where I learned HTML, CSS, Javascript, Python, and developed some frontend projects to enhance my skills in web development.
